Competency-based Training

Training Modules Example

**ACGME Competency Project Training Modules**: The University of Rochester designed six practical modules for residencies and fellowships based on competency objectives which are available in downloadable format. Topics such as Pain Management, Communicating Bad News, Informed Consent and Capacity are included. Each module provides objectives, formats, readings, slides, test questions and evaluation forms which could also be targeted toward undergraduate medical education.

Medical School Curriculum Example

**Competency Based Medical School Curriculum**: Indiana University provides their detailed checklist of nine necessary competencies, the specific knowledge base required, criteria for assessment, levels of achievement, and an assessment toolbox containing multiple examples.
