Program A: Research on Teaching and Learning Roundtable

Tuesday, May 10, 1:30pm – 4:00pm
MSU Union, MSU Room
(Registration at 1:00pm; program begins at 1:30pm)

Lunch Included

Facilitator:
Patricia Stewart, Director of Faculty and Instructional Development, F&OD, MSU

Intended Audience and Eligibility:
MSU Affiliates (Faculty, Post-Docs, and Graduate Students); and Non-MSU Affiliates.

This Roundtable will provide a forum for faculty, academic staff, post docs and graduate students who wish to share and discuss their research on teaching and learning with MSU colleagues. The Roundtable is designed to foster a network of scholars at MSU engaged in educational research and to support individuals in their efforts with the Scholarship of Teaching and Learning (SoTL), discipline-based educational research (DBER), and the use of learning analytics and big data to understand and promote learning.

Attendees are invited to present their scholarship of teaching and learning at any stage of development (from design to publication) and to explore their questions and concerns with others engaged in educational research. After introductions, attendees (or teams) will be invited to provide a 5-10 minute presentation about their work followed by 10 minutes for a moderated discussion. Attendees are welcome to bring posters, PowerPoints or handouts to support their comments, although more informal presentations and observers are also welcome. For more information, contact Patti Stewart at facdevel@msu.edu [1].
