Program B: Tech-Savvy Teaching: Melding In-Class and Online Pedagogies

**Tuesday and Wednesday, May 10-11, 8:30am - 3:30pm**  
**Thursday, May 12, 8:30am - 12:00pm**  
**MSU Union, Room 55 - Garden Level**  
(Registration at 8:00am; programs begins at 8:30am)

Light breakfast and lunch included

Facilitators:
David Goodrich and James Bender, Instructional Designers, IT Services: Teaching and Learning, MSU

**Intended Audience and Eligibility:**  
MSU affiliates only. **Limited to 20 participants**

This workshop will demonstrate how to integrate best practices of online and traditional instruction to create a flexible learning experience that benefits students, faculty, and administrators. The workshop will model a blended approach using the Desire2Learn (D2L) classroom management system.

During the first two days of the workshop, participants will meet face-to-face to explore evidence-based pedagogies, technologies, and communication strategies implemented in award-winning courses at MSU. Participants will work hands-on with the technologies presented to practice developing their own lessons. The final day will again be face-to-face: participants will share their lesson ideas and explore more global questions, such as preparing students for the online experience and evaluating the effectiveness of a course.

**Tech-Savvy Teaching Applications**  
**Due April 22, 2016**

This program is limited to 20 participants. To maximize your experience, priority will be given to instructors who have specific goals for this workshop. To apply, register for the workshop on the F&OD website and complete the application found at: [http://goo.gl/wlMwYr](http://goo.gl/wlMwYr)
